As good as you wish
ULTRA TECH
PRECISE HIFU SYSTEM

Lift and Tighten up your loose skin with “ULTRA TECH” without pain.

Get back to normal immediately after treatment.

Have noticeable results within one month with one treatment.
How to work “ULTRA-TECH” treatment

ULTRA-TECH treatment uses advanced ultrasound technology to precisely lift & tighten loose skin of face or neck.

It delivers High Intensity Focused Ultrasound (HIFU) energy to superficial dermis, deep dermis and subcutaneous tissue by each different depth cartridge.

HIFU energy can affect coagulation on each selected depth.

Advantages compared with Laser or Surgical treatment

- Non-surgical / Non-invasive
- No scar and redness on the skin surface
- Treat the targeted different depths (1.5mm / 3.0mm / 4.5mm)
- Possible to deliver precise focused energy to deeper than others

Applications

- Skin lifting & tightening
- Regenerate collagen inside tissue
- Wrinkle reduction on face & neck
- Improve Nasolabial fold
