WHAT IS IMPURE SKIN AND HOW DOES IT DEVELOP?

Impure, oily or acne-prone skin is caused by overactive sebaceous glands which produce excess sebum. This may lead to hyperkeratosis at the excretory ducts of the sebaceous glands. This abnormal thickening of the outer layer of skin prevents sebum from flowing freely to the surface, causing blockages and the formation of blackheads. This changed environment creates favourable conditions for acne-causing bacteria to multiply and purulent inflammation to develop. In turn, this results in pustules and papules as well as the associated discomfort and redness, which may spread to neighbouring areas of skin.

CAUSES & RISK FACTORS

- Hormonal Changes
- Food that raises your blood sugar level, milk, whey proteins
- Genetic predisposition
- Smoking
- Incorrect skincare regime
- Medication
THE SOLUTION FOR IMPURE SKIN – cellJET 10 MHZ ULTRASOUND

Oily, impure or acne-prone skin requires a quick, efficient and particularly effective method of treatment. This is exactly what is offered by the PURIFYING CURE: Combining cutting-edge 10 MHz ultrasound technology with the sebum-regulating Lignans found in the PURIFYING FORMULA, this unique 14-day treatment for use exclusively at home has been perfected to regulate the skin’s natural functions and to restore balance to impure skin. The treatment controls sebum production, reduces inflammatory impurities such as pustules and papules, lessens the discomfort and redness caused by inflamed skin, and minimizes pore size. The skin’s natural balance is restored for a visibly and tangibly refined complexion.

THE COMBINATION OF ULTRASOUND TECHNOLOGY AND THE HIGHLY ACTIVE INGREDIENTS IS AN ESSENTIAL PART OF THE TREATMENT’S SUCCESS.

THE INGENIOUS COMPONENTS

cellJET + PURIFYING FORMULA WITH SEBUM-REGULATING LIGNANS

* External safety assessment, 2015

REVIDERM

“LESS IS MORE” FORMULA
FREE FROM CHEMICAL PRESERVATIVES, COLORANTS AND FRAGRANCES
REGULATES SEBUM PRODUCTION
REDUCES INFLAMMATORY IMPURITIES, REDNESS AND DISCOMFORT
MINIMIZES PORE SIZE
