The HydroMassage® is a US-made product from a manufacturer that focuses only on improving the advanced technology of a dry hydrotherapy system for more than 28 years. It is widely used in chiropractic offices, fitness clubs, spas, salons, hotels, malls, corporate centers and more.

It gives a powerful and relaxing full body massage for only 10-20 minutes without the inconveniences of getting wet and undressed.

HydroMassage® has achieved UL, CSA and CE Mark. Tested and approved to safety standards requirements.

HydroMassage® provides users a total relaxation.

**FEATURES:**
- Smooth wave massage
- Full body, deep tissue and effleurage massage types
- Touchscreen control
- LED lighting panel package
- Multimedia entertainment menu
- HydroMassage® Desktop software package
- HydroMassage® Member Management software package
- Ability to run promotional videos
- Massage surface is waterproof/liquid proof
- No plumbing required
- Available in Black, Silver and Red

**BENEFITS:**
- Temporary relief from minor aches and pains
- Reduced levels of stress and anxiety
- Deep relaxation and a sense of well-being
- Increased circulation locally in massaged areas
- Relief from muscle soreness, stiffness and tension
HydroMassage® comes with a touchscreen control system and HydrOS interface that allows user to control the intensity of the massage, location and diversity. Providing total relaxation to where it is most needed.

This is the most advanced massage operating system in existence. Allowing users to have an access to a menu of entertainment options during the massage. It upgrades the “massage treatment” to “fully interactive massage experience”.

Propriety software packages are available to regulate in-club usage, and are fully compatible with any external timer, access card, currency acceptor, or key fob activation option.
