**Smart Sonic** is a tight-focused ultrasonic, non-invasive and non-surgical face lifting and body slimming system. It uses high intensity acoustic waves to stimulate the skin's dermal and aponeurosis layers. **High-Intensity Focused Ultrasound (HIFU)** energy directly goes into the different target layers by using different cartridges that are precise and safe to attain the desired facial and body treatment.

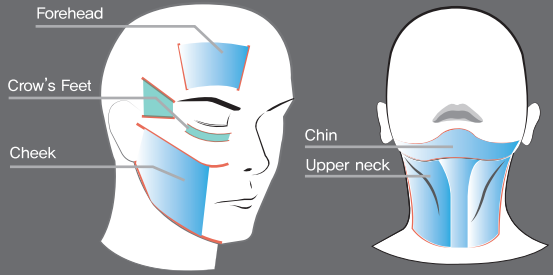

It is a multiple skin care system that combines the functions of lifting, elasticity, and tightening. It allows collagen to regenerate inside the tissue that would result to facial rejuvenation, body slimming and contouring.

DEPTH	TARGET LAYERS	APPLICATION
1,5mm	Epidermis	Reduces wrinkles, minimize pores & tones skin
3,0mm	Dermis	Pulls eyebrows, improve nasolabial fold
4,5mm	SMAS (Hot & Freezing Point)	Improves elasticity, face lifting & tightening
13mm	Subcutaneous fat layer	Reshape body line (forearms, thighs, hips & belly) by lifting, tightening & improving elasticity

HANDLES	CARTRIDGES (mm)	SHOTS PER CARTRIDGE
Single Shot	3.0 / 4.5	50,000
Multi-Shot	1.5 / 3.0 / 4.5 13.00	10,000
