

CRYSTAPEEL

THE PERFECTION OF MICRODERMABRASION

HIGHLY EFFECTIVE

Thanks to the special crystals and the dual vacuum system, the skin layers are effectively removed even at the lowest levels. The result: short treatment duration, a relaxed skin feeling and a radiant result!

Delicate and sensitive skin? Adjust the crystal setting to your individual needs and make microdermabrasion an even gentler experience for your discerning customers!

SENSITIVE PEELING

STEPLESSLY ADJUSTABLE

Choose the right intensity for the treatment. One turn - and the microdermabrasion has the desired strength.

The ergonomic handpiece made of ultra-light and sturdy carbon plastic weighs only 25 g and sits comfortably in the hand. This way you will still feel relaxed at the end of the day!

EFFORTLESS WORK

ABOUT US

Passion for biology, physiology, precision and technology is the driving force with which we have been developing and producing innovative products for many years. We have bundled this experience and contributed it as a team to the new sht Skin Health Technologies. Our interdisciplinary know-how enables us to think ahead and to design CRYSTAPEEL in such a way that, as the most effective system on the market, it brings the greatest possible benefit to our customers.

Share your experience with us: info@specbritegroup.com. Service is what drives us forward.

MICRODERMABRASION WITH CRYSTAPEEL

CRYSTAPEEL - the perfection of microdermabrasion

The upper layers of the skin are gently, precisely and extremely effectively removed by special crystals - layer by layer, controllable at any time and therefore individually adaptable to customer needs. This allows you to keep an eye on your customers' skin appearance and treatment status at all times.

CRYSTAPEEL removes the upper layers of the skin as well as excessive cornification. Even in the lower settings you can use the effect of a high removal rate and in just a few strokes you can give the skin a refreshed, even and youthful appearance, visible and noticeable.

After microdermabrasion, nourishing ingredients are better absorbed by the skin and unfold their effect down to the deeper skin layers. Studies also show that micro-dermabrasion increases the cell growth rate when used regularly as a cure and thus provides a lasting improvement of the skin structure.

The CRYSTAPEEL can be adjusted continuously and directly to the intensity of the treatment. This enables you to work extremely efficiently from the gentlest step onwards, so that you will have treated the skin areas in a shorter time than usual. This makes the CRYSTAPEEL treatment also suitable for very sensitive skin types and sensitive customers.

FOR A RADIANT, REFRESHED AND LASTINGLY IMPROVED COMPLEXION IN A WIDE VARIETY OF COSMETIC INDICATIONS:

PREVENTS PREMATURE SKIN AGING

- reduces fine lines and wrinkles
- improves the absorption of active substances
- increases the cell regeneration rate

FOR AN EVEN COMPLEXION

- adjusts irregular pigmentation
- refreshes a pale skin tone
- reduces visibility of age spots

SUSTAINABLE FOR STRESSED SKIN

- Aligns uneven areas such as post-acne scars with the normal skin complexion
- visibly reduces the appearance of pores
- improves the protective and barrier functions of the skin

Up until now several passes were necessary for an intensive abrasion. Our Dual Vacuum Power System provides you with maximum performance immediately and in every needed intensity. Particularly for special applications where maximum performance is required (e.g. scars, body treatments, etc.), this lets you work with a significant time advantage. Your customers will also benefit from the shortened intensive treatment.

sht CRYSTAPEEL
SKIN HEALTH TECHNOLOGIES

HANDPIECE - HIGHLIGHTS

- ultralight, carbon-reinforced handle for fatigue-free working
- ergonomically shaped shaft sits perfectly in the hand
- easy exchange of nozzle and tube due to innovative Easy-Click-System

SOFT & EFFECTIVE

- stepless direct adjustment of the desired abrasion
- minimal vacuum for sensitive areas (eyes) and delicate skin (couperose)
- maximum power for intensive applications (body, scars)
- Efficient abrasion for maximum removal at shortest time

PUREST CRYSTALS

- extremely economical in consumption-from 75 g/10-Min.
- Crystal consumption directly adjustable
- Moisture-proof closure of the system
- Special crystals for perfect results
- environmentally friendly glass packaging

Technical data

Handpiece weight	25 g
Dimensions (cm)	Width 37/Depth 32/Height 24
Crystal consumption	effective* 7.5 g - 22.5 g/min. theoretical* 10 g - 30 g/min.

* Specification of the theoretical consumption value: when the handpiece is continuously closed, the crystal consumption values are approx. 10 g to 30 g / minute (depending on the selected setting). In normal operation mode (=effective crystal consumption), you move the handpiece over the skin for approx. 3/4 of the time, then lift it up and put it back on.
