REVIDERM – THE (R)EVOLUTION OF MICRO-NEEDLING.

For more than a decade, micro-needling has been considered the secret weapon among anti-aging methods used to treat visible skin problems. Thanks to its unique effect, it is impossible to imagine professional dermocosmetics without it.

Beautiful skin requires absolute precision. Micro-needling uses the body's self-healing mechanisms – for even, younger-looking skin. **MICRO-FINE NEEDLES** perforate the skin with pinpoint precision, creating small, targeted micro-injuries that initiate the skin's own healing process.

Other procedures used to date may seriously damage the skin unnecessarily or prevent it from fully releasing its efficiency.

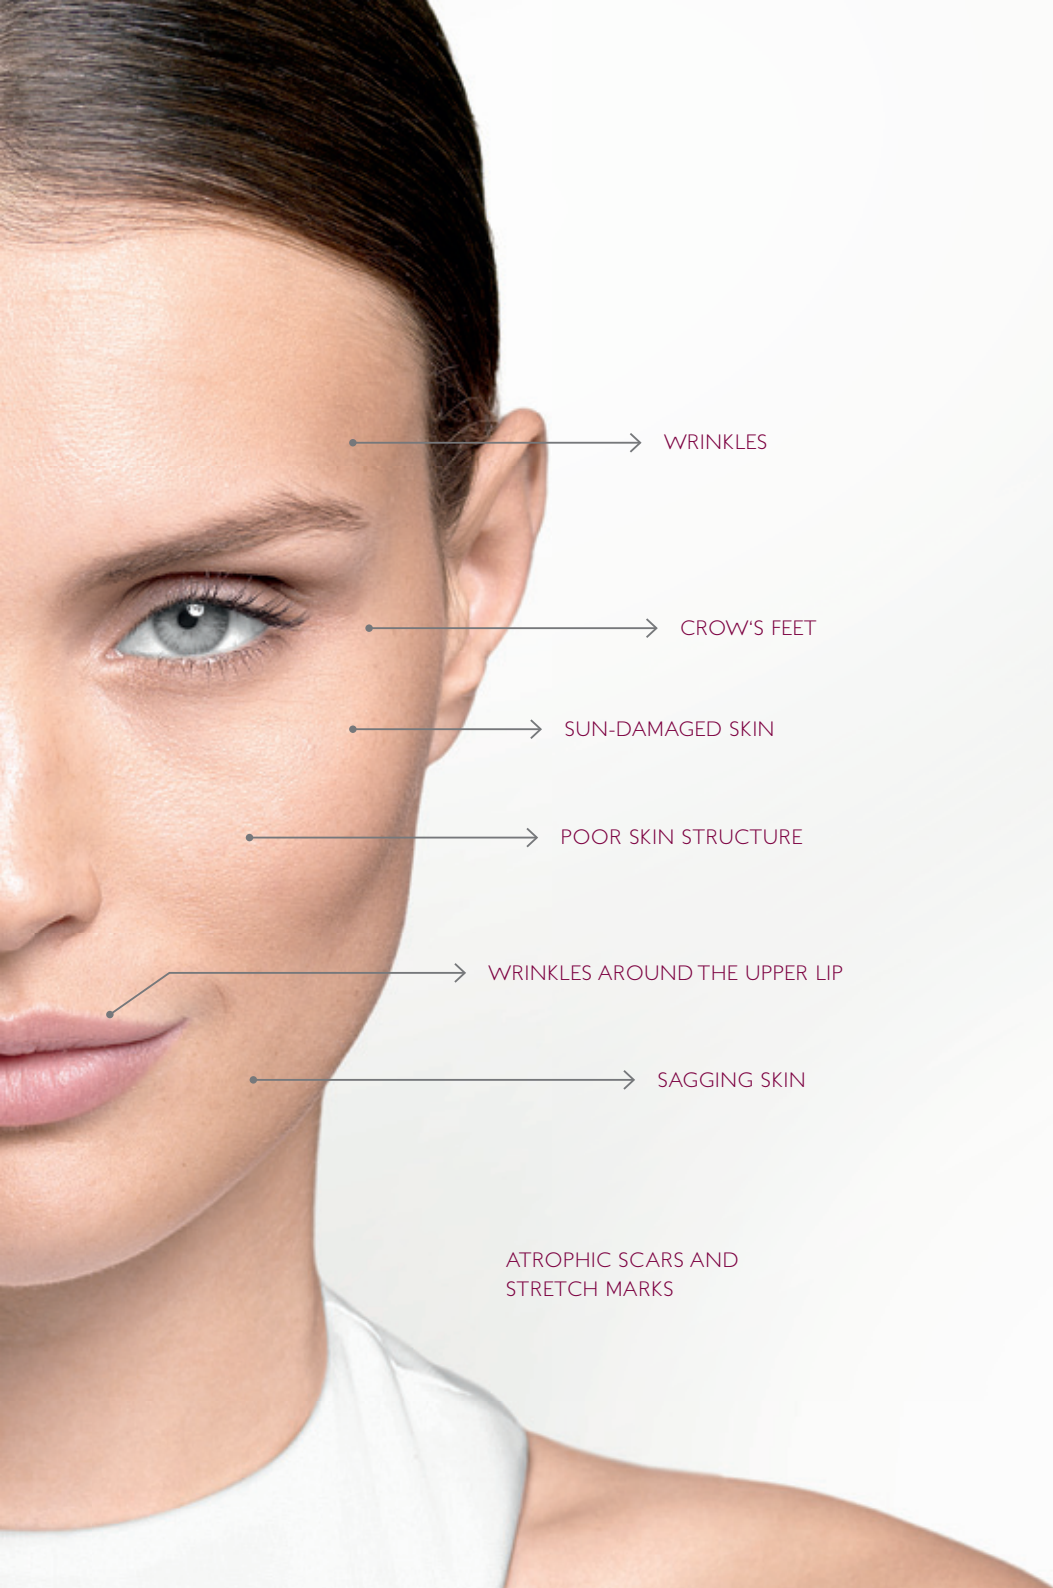

Thanks to its position as the **GLOBAL MARKET LEADER** in microdermabrasion, its 30 years' experience in dermo-cosmetics, and comprehensive range of techniques and skincare products, REVIDERM is once again revolutionizing the micro-needling market with a groundbreaking innovation, the **REVIDERM SkinNeedler**.

The completely new and well-considered arrangement of the needles – **TEN NEEDLES IN A ROW** – of the innovative Precision Liner ensures ultimate penetration precision. Skin penetration is precise, surprisingly painless and minimally invasive. No „fakir“ effect or trauma caused by tears for impressive results without long recovery times.

METHOD OF ACTION*:

- NEOSYNTHESIS OF COLLAGEN, ELASTIN AND HYALURONIC ACID
- IMPROVED LOCAL BLOOD SUPPLY (NEOANGIOGENESIS)
- RENEWAL IN AREAS OF STRUCTURAL DAMAGE
- INCREASED ABILITY TO ABSORB ACTIVE INGREDIENTS

NEXT LEVEL COSMETICS: HIGHLY ACTIVE FORMULA WITH A BIOMIMETIC PEPTIDE.

The skin's own regulation mechanisms and regulating molecules served as models for developing the **HIGHLY ACTIVE FORMULA** (totally biomimetic). Every serum consists of one primary active ingredient (biomimetic peptide) being able to release targeted effect into the skin.

NEURO-SENSITIVE FORMULA

POSITIONING

Soothing formula for application BEFORE micro-needling into neurosensitive skin.

KEY BENEFITS

Alleviates hyperreactive, excessive skin reactions and counteracts neurogenic inflammation processes. Promotes balance and reduces discomfort and itching. Increases tolerance and comfort during micro-needling.

RECOMMENDATIONS FOR USE

Optimum results are achieved by administering six successive treatments over a period of three months. For even better results, microdermabrasion should be included in the treatment process.

TARGET GROUP

Neurogenic-sensitive and hypersensitive skin that is prone to allergies, seborrhoea sicca related to the nervous system.

PRIMARY ACTIVE INGREDIENT

The main agent is PALMITOYL TRIPEPTIDE-8, a well-researched, biomimetic and anti-inflammatory neuropeptide for treating irritated, inflamed and sensitive skin.

HOW IT WORKS

PALMITOYL TRIPEPTIDE-8 inhibits the release of substance P, a neurotransmitter in the skin, while alleviating unpleasant sensations such as burning or itching, and inhibiting the release of interleukin 8.

CONTOUR-LIFT FORMULA

POSITIONING

Skin-firming formula for application BEFORE micro-needling treatment into aging skin.

KEY BENEFITS

Firms and tightens the skin, reduces skin tension, lifts contours, reduces wrinkles, and helps scarred skin to regenerate

RECOMMENDATIONS FOR USE

Optimum results are achieved by administering six successive treatments over a period of three months. For even better results, microdermabrasion should be included in the treatment process.

TARGET GROUP

Aging skin with declining firmness.

PRIMARY ACTIVE INGREDIENT

The main agent is PALMITOYL TRIPEPTIDE-38, an innovative biomimetic peptide from the matrikine family.

HOW IT WORKS

PALMITOYL TRIPEPTIDE-38 stimulates collagen production, firming, toning and refining the skin. It stimulates six important parts of the matrix and junction between the epidermis and dermis (DEJ). It also ensures optimal tissue architecture, regulates cell activity, optimizes repair processes and rebuilds skin substance from the inside out.

TEXTURE / PRESENTATION

Both FORMULAS are hydrophilic, oil free, free of preservatives, PEGs, PPGs, colorants and silicones, and are designed for single-dose (5 ml), one-time use.

*Expert safety evaluation according to European safety regulations for combined application, 2015

MORE PROFESSIONAL. SAFER. MORE TRUSTWORTHY.

COMPLETE COMPETENCE DOWN TO THE LAST DETAIL.

Unique on the market thanks to its technical abilities, the REVIDERM SkinNeedler also leads the way when it comes to safety. REVIDERM delivers facts, not reasons – and these speak for themselves:

- **SEAL OF TRUST** – safe, combined application of the formula using device-based technology
- Retention of high **HYGIENE STANDARDS**:
Skin disinfection / gloves / one-time use of needle modules / collection container
- **PROTECTIVE NOZZLE** ensures the selected depth is fixed when needling
- Intensive **TWO-DAY TRAINING** with testing and certificate
- **CUSTOMER INFORMATION** before each treatment
